EFP decides to move Perio Master Clinic 2017 to Malta because of political situation in Turkey

The EFP has decided to move the venue of the EFP Perio Master Clinic 2017 from Istanbul to Malta because of recent political developments in Turkey. The event will remain under the chairmanship of Korkud Demirel and it will still be hosted by the Turkish Society of Periodontology.

Study shows that short dental implants produce similar results to long implants with sinus grafting

The use of short (6mm) dental implants results in similar clinical and radiographic outcomes to the use of long (11-15mm) implants combined with sinus grafting, according to a study published in the EFP's research summary JCP Digest.
