You have until February 27 to take advantage of a huge discount on early registration for the world’s leading conference in periodontology: EuroPerio8

And these two new short videos on EuroPerio8 will give you the big picture on state-of-the-art surgery & practice and critical factors in implant dentistry presentations. Click here to register now for EuroPerio8.

EuroPerio8 speakers personally invite you to attend their presentations - subscribe to the EFP's YouTube channel and watch all videos

See many video clips about the international periodontal experts coming to London this June, most of them in English... some in your national language.

JCP Digest 10: summary of a recent key study on patient compliance rates and impacting factors for supportive post-implant therapy

Condensed, easy-to-read research explains the background, aims, and results of a retrospective 3-year cohort study investigating compliance of patients placed on SIT programmes.

Have you treated patients with Papillon-Lefèvre or Kostmann syndrome?

UK researchers want your clinical data and biological samples for key research involving these extremely rare neutrophil-related diseases that affect the periodontium. Can you help? Follow this link to the survey.
