The advantages of air-polishing in supportive periodontal therapy (SPT)?

Assessing the efficacy of this method of removing newly formed bacterial deposits from residual pockets was the aim of a study published in September 2014 by the EFP’s prestigious Journal of Clinical Periodontology and summarised for clinicians in this JCP Digest.
EFP's Facebook popularity climbing rapidly

Over 700 'likes' on Facebook is proof positive of the growing impact of the EFP on social networks. Not such a spectacular response? Just two months back the page had only 100 'likes'. The imminence of EuroPerio8 is increasing the EFP's international profile. Come and like the EFP at:
